SUPPLEMENT TO
REPORT NO.

25X1X

1. The attached chart gives the total planned production for 1951 of the VEB Lokomotiv-Elektrotechnische Werke, Hennigsdorf.
2. On the original document the production was given both in gross (Brutto) production and consumer (Waren) production. In all but one case these two columns were exactly the same. The one exception was electric power manufactured from hard coal where the gross production was five million KW/h and the value 175,000 DM. The consumer production was 1.2 million KW/h and the value 42,000 DM. The difference, 3.8 million KW/h, was for plant consumption.

This document is hereby regraded to
CONFIDENTIAL in accordance with the
letter of 16 October 1978 from the
Director of Central Intelligence to the
Archivist of the United States.
